Re: Buckeye and Iron Streets – Street and Drainage Improvements
City of Deming Project

To City of Deming Residents:

The City was awarded funds for construction of drainage and street improvements along Buckeye Street from Granite to Iron, on Iron Street from Buckeye to Florida, and the intersection of Copper and Buckeye. Construction is slated to begin the week of May 29th with Southwest Concrete and Paving, Inc. as the general contractor.

Iron Street will be the first phase of work which includes a drainage ditch on the west side of Iron Street along with culvert crossings at school entrances. Due to the new drainage ditch location on the west side of Iron, Iron Street will be reconstructed and moved easterly closer to the west property boundaries located along the east side of Iron Street. Second phase will be construction on Buckeye including mostly ditch work on the north side. The intersection at Buckeye and Iron will be reconfigured so that the intersecting sides of Buckeye will align with each other.

The final product will minimize storm water traveling in the street as the ditch will help to carry some of the storm water from Granite Street to Florida Street.

We ask for patience during construction as this beneficial project improves the City's storm water drainage system.

The City is pleased to have been awarded design and construction funds from both Community Development Block Grants (CDBG) and Colonias Infrastructure Funds (CIF). Without their assistance, this project would be impossible for the City to implement, design, and construct.

If there are any questions or concerns, please contact the City of Deming Public Works Department at 575-546-8848.
